SOLDIERFIT

Digital Guest Register

I am a new guest

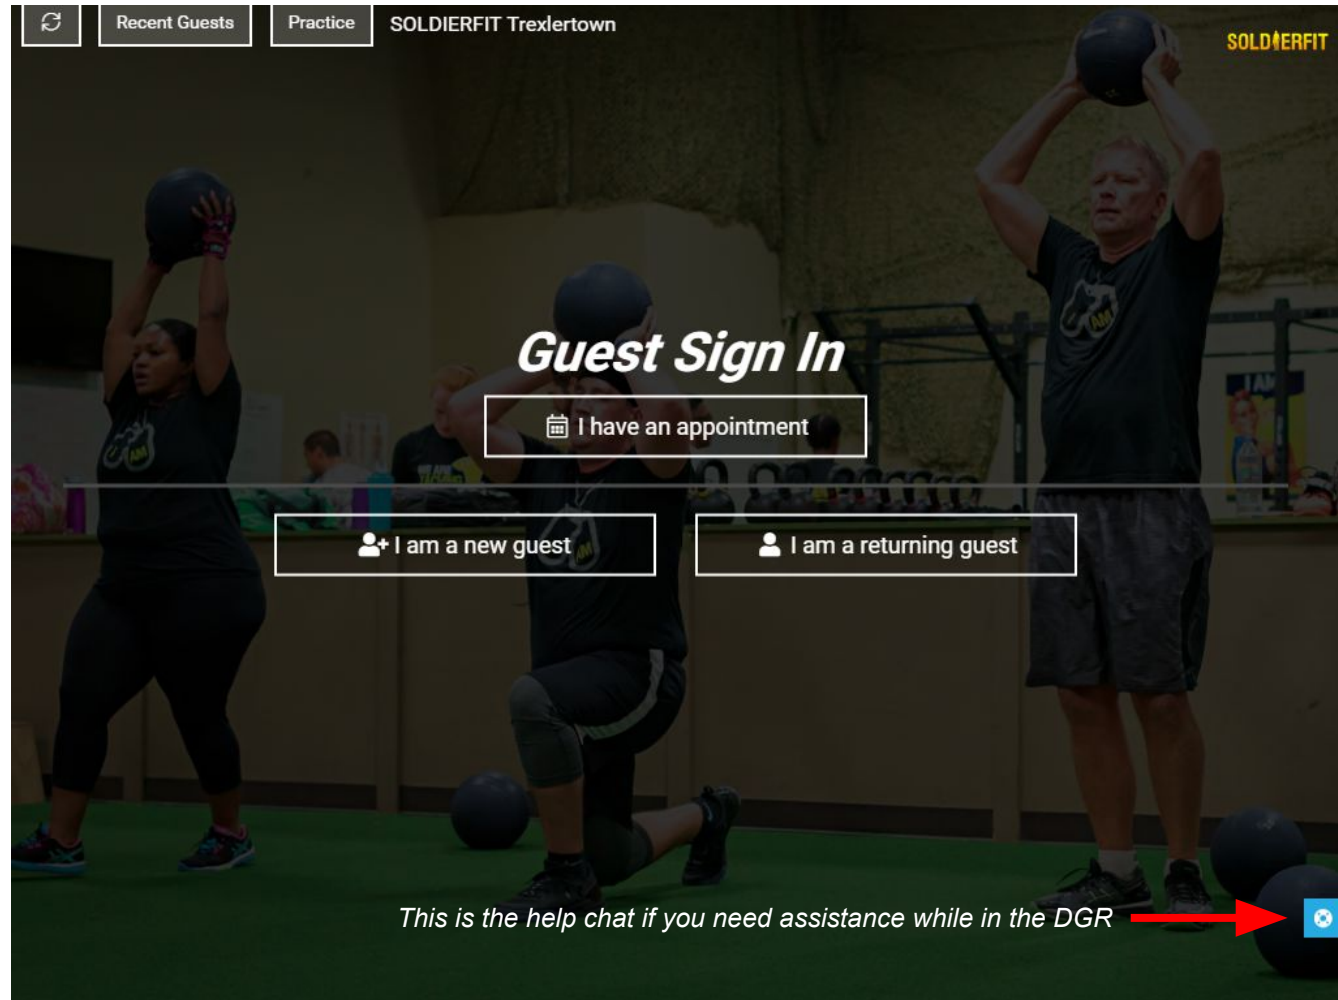

All guests should fill this out. This is where the Guest Liability Waiver signature lives.

I am a returning guest

If a guest has registered before, they can tap this and check in using their name, email or cell phone. If they do not have a Guest Waiver Signature on file, it will prompt them to add one.

I have an appointment

The guest (or member) will tap this button to check in for an appointment they have today. They search for their name, email or phone, it will only search through the records who have appointments scheduled for today. Signing in this way will automatically mark the appointment as **shown** which will keep the Missed Appointment track from starting.

Digital Guest Register

I am a new guest (pg1)

All guests should fill this out. This is where the Guest Liability Waiver signature lives.

First Name, Last Name, Email, Cell Phone, Signature, and Agreeing to the Guest Waiver are **always** required.

Gender and Birthday are options you can disable or not require, however, we recommend leaving birthday since we do not communicate with Minors.

How did you hear about us?

At least one option should be checked. (Just one is preferred, the one that really brought them in!)

Digital Guest Register

Recent Guest Menu

Tap the Recent Guests button to reveal the guests who have registered or been synced recently.

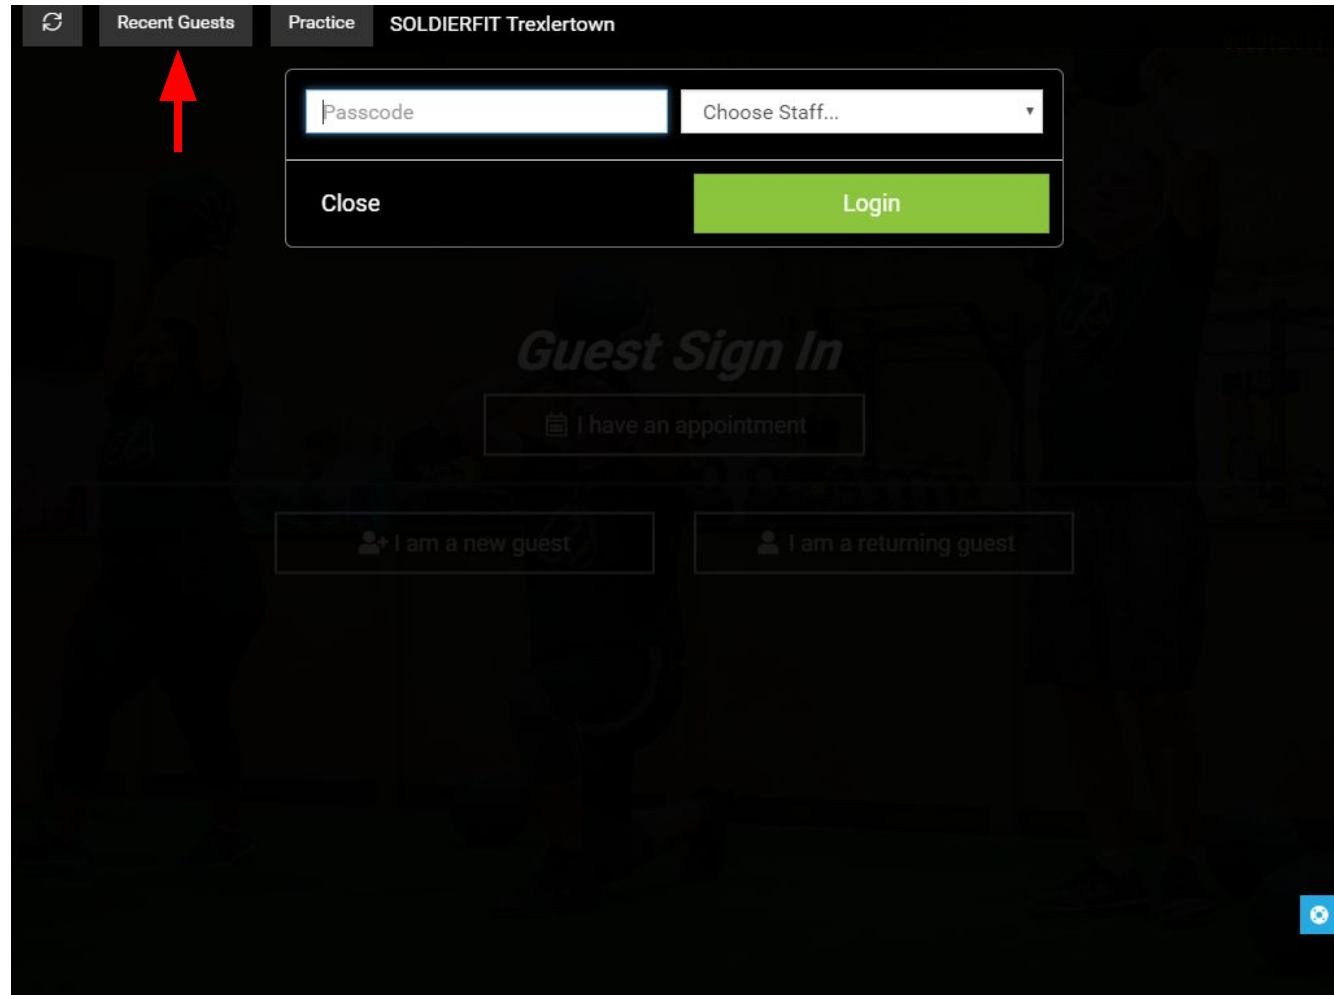

*Tap Practice to run through a test without registering the events.

Passcode is 'vfp'

This passcode is enabled to keep guests from viewing other guests' contact information. If the DGR is always managed by an employee, you can disable this passcode, however, it's most common to leave this enabled.

Choose Staff...

Choose the staff member that will be taking the guest on a tour, presenting membership pricing, scheduling an appointment, or assigning a guest pass.

Digital Guest Register

Recent Guest Menu

This list shows guests only and are in chronological order from most recent to least recent.

You can also search for guests using their Name, Phone, Email, or date they last visited.

Synced with Motionsoft

You'll notice that there is check mark on the left side, if this shows instead of a dash, this guest is synced with Motionsoft. It can take 1 minute up to 2 hours to sync with Moso if you do not tap the Complete Registration button. This delay allows the in-club guest to make a purchase decision before creating a prospect record for them.
